Marabu Airlines and Lufthansa Technik expand cooperation

▪ Total Component Support for Estonian company for several more years

Lufthansa Technik and the Estonian Marabu Airlines have agreed to extend their cooperation. The global market leader in the field of technical aircraft services will now take over the airline's component supply for several more years as part of a Total Component Support (TCS) agreement. The new contract supports Marabu's ongoing Airbus A320neo fleet expansion.

Lufthansa Technik and Marabu have been working together since the airline started operations in 2023. The TCS, which is valued by customers worldwide, offers Marabu access to Lufthansa Technik's global pool of serviceable spare parts, repair services and logistical support. It ensures high availability and fast processing for almost all replaceable aircraft components. In addition to the TCS, the cooperation between the two companies already includes the supply of consumables and expandables to the airline, aircraft engineering services and certification support by Lufthansa Technik.

Laszlo Molnar, Technical Director at Marabu Airlines, commented: "Our partnership with Lufthansa Technik supports Marabu's continued growth and ambition. As our fleet expands, having a strong technical partner allows us to maintain the high operational standards our passengers and partners expect."

"We are honored that Marabu not only extend but also expand their contracts with us. For us being a company in Germany, Marabu is even more special since they offer flights out of several German airports," said Tanja Pustolla, Corporate Sales Executive Europe, Middle East and Africa at Lufthansa Technik. "We have established a very successful working relationship, and it is a privilege being part of Marabu's growth."

About Marabu Airlines:

Marabu Airlines is a young and dynamic Estonian leisure carrier founded in 2022 and based in Tallinn. Since launching operations in April 2023, the airline has already flown more than two million passengers from Germany to some of the most attractive destinations around the Mediterranean. The airline operates a modern fleet of eight Airbus A320neo aircraft, each equipped with the latest technology and configured with 180 seats across two classes – Economy and Business. With its strong digital mindset and agile approach, Marabu combines innovation, efficiency and genuine customer care to create an enjoyable travel experience.
