Boeing and Lufthansa Technik extend tailored parts deal

▪ Long-term agreement enhances parts availability and cost predictability for airlines worldwide

Boeing and Lufthansa Technik have renewed their longstanding Tailored Parts Package (TPP) agreement, continuing a collaboration designed to improve parts availability and make costs more predictable. The three-year renewal was announced at MRO Europe.

The agreement covers more than 6,500 Boeing part numbers across all Boeing commercial aircraft platforms, enabling Lufthansa Technik to provide its airline customers with enhanced material availability, streamlined procurement processes and greater cost predictability.

Boeing assumes supply chain execution for the defined parts covered by the agreement, while Lufthansa Technik leverages the program to further strengthen its component support capabilities. The collaboration allows Lufthansa Technik to secure access to critical parts, reduce sourcing complexity, and enhance planning reliability for customers operating Boeing fleets.

“A healthy, stable aviation supply chain depends on experience, capability and reach. This agreement brings those strengths together to help customers plan their parts needs with greater confidence,” said William Ampofo, Senior Vice President, Parts & Distribution and Supply Chain at Boeing Global Services.

“Reliable access to material is a key factor in maintaining aircraft availability and operational efficiency,” said Thomas Boettger, Vice President Corporate Procurement at Lufthansa Technik. “Through this renewed agreement with Boeing, we further strengthen our ability to provide customers worldwide with dependable parts support across all Boeing aircraft platforms. The combination of broad parts coverage and secure supply chain access creates tangible value for airlines in today’s demanding operating environment.”

The renewed contract strengthens Lufthansa Technik’s comprehensive component services portfolio and supports airlines worldwide in maintaining high fleet availability while benefiting from greater planning certainty and procurement efficiency.

About Lufthansa Technik:

The Lufthansa Technik Group is one of the leading providers of technical aircraft services in the world. Certified internationally as maintenance, production and design organization, the company employs around 23,000 people in dozens of locations around the globe. Lufthansa Technik offers the full range of services for commercial, VIP and special mission aircraft. The portfolio includes maintenance, repair, overhaul and modification of airframes, engines, components and landing gears, as well as the manufacture of innovative cabin products and digital fleet support.
